Reservoir Land Use Application – ID #:4023317

The City of Hiwassee currently provides Waste-Water services for all of Towns County with the exception of the Young Harris City system which services that small number of customers. The City currently managers 22 lift stations throughout our system (MAP A-Attached). In order to address several issues, we are asking the approve a new larger lift station that will in turn allow us to decommission 2 smaller lift stations. The issues that will be addressed will be growth in the area, a more streamline operation, safety for our employees as the existing lift station located at the Ridges site in just a few feet off of the main State Highway, highway 76, and better protect the lake in that area. (MAP B-Attached). This new lift station would occupy an area of 35 feet by 25 feet (875 SQ Ft) at a new location with proper elevation.

The city does not foresee any negative impact to this project. It will however allow for increase growth in that area, leading to more Economic Development and increase processing of Wastewater to the Northwest area of our System. In addition to better processing, this will also alleviate the maintenance of 2 lift stations that will be de-commissioned. This will help tremendously in the City budgeting for Lift Station maintenance.

The application reference above ID#: 4023317 has been approved by TVA.

For further information, please contact me at any of the venues listed above or via email at [mayor@hiwasseeega.gov](mailto:mayor@hiwasseeega.gov)
